

Agility Suite for BMC Helix

Easily add required Project and Portfolio Management to ITSM and ITOps processes while aligning with the Autonomous Digital Enterprise Platform. Agility Suite is a comprehensive, graphical tool that seamlessly connects Project and Portfolio Management with Idea Sourcing, Idea Management, and Demand Generation.

Organizations implement DevOps methodologies across the business. By coupling business processes with IT practices, you can fully control costs and resources. To do this successfully, however, you need a way to track agile projects, manage the service lifecycle, and ensure that no project requirements are forgotten.

Agile and DevOps processes such as enterprise service management, which combines ITSM and Business Workflows, are best supported by interactive graphical visualizations like Kanban and Gantt Charts. To enhance the BMC Helix portfolio, Agility Suite provides a state-of-the-art solution for agile management of processes including demand, portfolio, requirement, and project management.

Key Benefits

- Flexibly manage agile projects including ideas, requirements, tasks, and schedules.
- Make decisions from a single portfolio view that tracks historical and future requirements.
- Automate scheduling, task assignment, and backlog creation.
- Promote innovation in Digital Workplace, where employees can submit ideas, vote on other ideas, and track and explore popular ideas for development.

Based on and mapped to the BMC Helix and Business Workflows platforms, Agility Suite helps users add core functionality, including Project and Portfolio Management and Idea Sourcing and Management, to ITSM and IT Operations processes. Agility Suite delivers actionable insights to support the agility needed to become an Autonomous Digital Enterprise.

Agility Suite transforms agile project management directly on the BMC Helix platform, so you don't need a separate application—ensuring quick value realization. Agility Suite is a holistic end-to-end solution that guarantees no requirements/task loss. Its low- and no-code approach makes it easily extendable and customizable across the Helix platform, so you're productive from Day One.

Key Features

- **Idea Sourcing:** Source, track, edit, and vote on employees' ideas.
- **Idea Management:** Manage innovation and leverage improvement potential with full Digital Workplace integration.
- **Demand Management:** Test the viability of the best ideas by collecting requirements, analyzing risk, allocating resources, and determining the stakeholders.
- **Portfolio Management:** Centrally manage all portfolio activities with IT-only or LOB views.
- **Graphical Project Management:** Visualize project management with graphical drag and drop and Kanban and Gantt Charts to support agile team work.
- **Track everything:** Never miss a detail thanks to these functions:
 - **Requirement Management.** Control all projects and track historic and new requirements, so you'll never lose a request.
 - **Save tasks for later.** Moving a task to next sprint? All requests can be saved in the platform and automatically assigned for the next release or project.
 - **Backlog creation.** Automatically create a pipeline of work from backlogs and previous requests.
